Course Description

This interdisciplinary Quest 1 course introduces the role of contemporary art as an engaged interdisciplinary practice, capable of empowering students to think through some of society's most pressing concerns and to question and reinvigorate a social civic and political imagination.

What does it mean to be an engaged citizen in the 21st century, and how can contemporary art spark dialogue, empathy, invention, and participation?

The course is designed to encourage students to articulate, challenge and redefine themselves as active, creative and empathetic participants in a global culture. No prior art making experience is required, but rather a curious, critical and creative sensibility. Students will be exposed to a diversity of creative strategies, possibilities and projects by interdisciplinary artists throughout the semester, to inspire creative and critical thinking. Students will simultaneously engage in collaborative and individual research, leading to a proposal of a visual and/or experiential artwork (in the broadest sense of the term) that will open-up new avenues of reflection, experience, communication, collaboration and real-world problem solving. The course will explore the diverse ways artists have examined and highlighted systems of power and the politics of globalization, labor, migration, citizenship, activism, economic inequality, justice, history, conflict, terrorism, environmentalism, and information technology to enlighten audiences on invisible or unimagined realities. Informed by a provocative mix of art lectures, readings, videos, research, focused conversations, ideation, collaboration, field trips and visiting artists; students will proactively investigate aspects of global citizenship, present research, ideate, and present/propose creative works of art. The course is designed to spark dialogue, empathy, invention, and socio-political engagement, and to promote student participation in the imagining and re-shaping of a brighter and more equitable future.

Course Delivery

This course will be a constant sharing of creative research, resources, ideas and practice by both faculty and students. For the most part on **Wednesdays**, the instructor will model creative research and exemplary art practice by showing a diversity of artworks, by inviting visiting arts professionals to share their work, and by leading discussions about weekly readings and responses to creative prompts explored on the course blog

and in student idea/drawing books. Students will share some of their reflections about themes explored in the course, as well as their own experience with the creative process throughout the semester. **Mondays** will be reserved each week for a series of student presentations. Students will share additional examples of creative strategies and artworks engaging course themes and will lead conversations with their peers.

Quest and General Education Credit

Quest 1

Quest 1 courses are multidisciplinary explorations of essential questions about the human condition that are not easy to answer, but also not easy to ignore: What makes life worth living? What makes a society a fair one? How do we manage conflicts? Who are we in relation to other people or to the natural world? To grapple with the kinds of open-ended and complex intellectual challenges they will face as critical, creative, and self-reflective adults navigating a complex and interconnected world, Quest 1 students apply approaches from the humanities to mine works for evidence, create arguments, and articulate ideas.

International (N)

International courses promote the development of students' global and intercultural awareness. Students examine the cultural, economic, geographic, historical, political, and/or social experiences and processes that characterize the contemporary world, and thereby comprehend the trends, challenges, and opportunities that affect communities around the world. Students analyze and reflect on the ways in which cultural, economic, political, and/or social systems and beliefs mediate their own and other people's understanding of an increasingly connected world.

This course accomplishes the [Quest](#) and [General Education](#) objectives of the subject areas listed above. A minimum grade of C is required for Quest and General Education credit. Courses intended to satisfy Quest and General Education requirements cannot be taken S-U

Due dates and weekly prompts along with grading criteria, descriptions and examples for the prompts will be posted on e-learning to give students an idea of what is expected at each check. It is not drawing talent that is being evaluated but rather energy and commitment demonstrated to visually record observations, ideas, independent creative research, images/drawings and influences. It is a record of all creative thought, process and action throughout semester. The instructor is available any time during the semester to talk with students about their idea/drawing book, or to give feedback and suggestions for improvement.

50 pts.	Creative and Reflective: Work exhibits effort, energy, and care, reflecting on one's own relationship to the topic in response to the weekly drawing/research/writing prompts.

Presentation Rubrics

Final grade will be based equally on the following individual and collaborative grades:

25%	Overall attention to assignment (see description and criteria on canvas)
25%	Understanding and communicating the thematic topic assigned and educating your peers based on your individual research (<i>content and communication</i>)
25%	Artist research – artists/artworks/images chosen are appropriate to thematic topic. Analytical Essay Rubrics

In addition to meeting the requirements and objectives clearly outlined in the assignment description on canvas, the grade will be based on the following considerations:

	SUCCESSFUL PAPERS (A or B)	UNSATISFACTORY PAPERS (C or below)
CONTENT	Papers exhibit at least some evidence of ideas that respond to the topic with complexity, critically evaluating and synthesizing sources, and provide at least an adequate discussion with basic understanding of sources.	Papers either include a central idea that is unclear or off- topic or provide only minimal or inadequate discussion of ideas. Papers may also lack sufficient or appropriate sources.
ORGANIZATION AND COHERENCE	Documents and paragraphs exhibit at least some identifiable structure for topics, including a clear thesis statement but may require readers to work to follow progression of ideas.	Documents and paragraphs lack clearly identifiable organization, may lack any coherent sense of logic in associating and organizing ideas, and may also lack transitions and coherence to guide the reader.
ARGUMENT AND SUPPORT	Documents use persuasive and confident presentation of ideas, strongly supported with evidence. At the weak end of the Satisfactory range, documents may provide only generalized discussion of ideas or may provide adequate discussion but rely on weak support for arguments.	Documents make only weak generalizations, providing little or no support, as in summaries or narratives that fail to provide critical analysis.
STYLE	Documents use a writing style with word choice appropriate to the	Documents rely on word usage that is inappropriate for the context, genre, or

	context, genre, and discipline. Sentences should display complexity and logical sentence structure. At a minimum, documents will display a less precise use of vocabulary and an uneven use of sentence structure or a writing style that occasionally veers away from word choice or tone appropriate to the context, genre, and discipline.	discipline. Sentences may be overly long or short with awkward construction. Documents may also use words incorrectly.
MECHANICS	Papers will feature correct or error-free presentation of ideas. At the weak end of the Satisfactory range, papers may contain some spelling, punctuation, or grammatical errors that remain unobtrusive, so they do not muddy the paper's argument or points.	Papers contain so many mechanical or grammatical errors that they impede the reader's understanding or severely undermine the writer's credibility.

Socially Engaged Art Project Rubrics

25 pts.	AMBITION/COMITTMENT: The level of commitment demonstrated to develop an in-depth socially engaged artwork, to research the subject on multiple levels, and to spend the time needed to fully articulate the ideas visually with consideration of audience interpretation. (I want to see amazing effort-whatever your skill level to visually communicate your ideas).
25 pts.	CONCEPT: The concept of your project or proposal will be evaluated on how well it is able to engage an audience and/or visually convey your ideas/concerns.
25 pts.	CRAFT: The formal and material aspects of the work and the care taken to create the work in the best way you are able, using appropriate materials, taking care to craft and present the work. We will submit these to an online Instagram page for the course, so both the quality of the work and documentation is key.
25 pts.	PROCESS: This includes completion of 3 preliminary proposals in sketchbook; meeting with instructor individually about your proposals; small group critique with students; and writing, documentation, and presentation of project in an online format. Each work should have at least one quality photo/digital image in JPG format and a 150-word description of project. See course Instagram for examples of student works and accompanying brief artist statements.

Course Policy on Generative AI

To ensure all students have an equal opportunity to succeed and to preserve the integrity of the course, students are not permitted to submit text that is generated by artificial intelligence (AI) systems such as ChatGPT, Bing Chat, Claude, Google Bard, or any other automated assistance for any classwork or assessments. This includes using AI to generate answers to assignments, presentations, and projects, or using AI to complete any other course-related tasks. Using AI in this way undermines your ability to develop critical thinking, writing, or research skills that are essential for this course and your academic success. Students may use AI as part of their research and preparation for assignments, or as a text editor, but any text that is

submitted must be written by the student. For example, students may use AI to generate ideas, questions, or summaries that they then revise, expand, **and cite properly**. Students are responsible for all content they generate for the course, regardless of how the work is generated and should be transparent on their use of generative AI and ensure they are adhering to UF academic integrity standards. MLA citation requirements can be found at: <https://style.mla.org/citing-generative-ai/> Students should also be aware of the potential benefits and limitations of using AI as a tool for learning and research. AI systems can provide helpful information or suggestions, but they are not always reliable or accurate. Part of this course is learning how to communicate effectively visually and through writing. If you do not put in the time, you will not become a better presenter, creative or writer. Students should critically evaluate the sources, methods, and outputs of AI systems. Violations of this policy will be treated as academic misconduct. If you have any questions about this policy or if you are unsure whether a particular use of AI is acceptable, please do not hesitate to ask for clarification.

Blog entries, project proposals and analytic essay will ask students to interpret works of art and relate content to their everyday lives or future goals/interests. **(Content, Critical Thinking, Communication and Connection SLOs for Gen Ed International and Quest 1)**

In **Art and the Global Citizen**, objectives will be met in a variety of ways. Students will self-reflect and critically engage with Quest 1 course content related to justice and power, through weekly readings, exposure to socio-political international and multidisciplinary artworks and visiting artists, participation in class and cultural activities, small group discussions, collaborative multi-media presentations, individual research in the form of an idea/drawing book, interpretation of artworks and analysis of the creative strategies artists employ to present and/or solve problems in social justice, and the design and presentation of socially-minded art proposals.

Quest and General Education International student learning objectives will be accomplished through:

- Evaluation of student understanding of art as an interdisciplinary practice capable of highlighting, challenging and re-negotiating systems of power and justice.
- Assessment of student Interpretation of artworks that communicate aspects of global culture and political engagement impacting everyday lives.
- Evaluation of student understanding of politics as a distribution of certain roles to members of a community and the mechanizations of power that determine what voices can be heard in a community and which may be silenced.
- Evaluation of the research, design and presentation of student proposed artworks that contend with complex real-world problems. The proposed artworks demonstrate the role of creative practices in the production of political and social engagement and/or transformation.
- Evaluation of analytical essay where students construct arguments and engage critical thinking about the creative strategies employed by artists and the role of art and citizen engagement in an interconnected world.

Quest Learning Experiences

Details of Experiential Learning Component

Students visit the Harn Museum of Art to view actual artworks in person. They are encouraged to attend one of the Thursday evening, *Art After Dark*, events with other students in the course, but they may also visit the exhibitions anytime during the semester on their own. This experiential assignment, *Our Times/My Life*, asks them to select a particular work of art they relate to (and one that is also related to class discussions and content on socially or politically engaged art.) After the visit (via the course blog) students share the artwork they selected and reflect how it makes them think anew about their own daily life or role within history or culture at this particular time.

Details of Self-Reflection Component

Students keep a sketchbook throughout the semester which includes free drawing and writing as well as visual responses to weekly prompts that are connected to course content. Prompts are designed to encourage students to link course lectures, discussions, readings, independent research and artist influences to ideas and expressions reflective of their own life, experiences and interests. In addition, students understand how socially engaged ideas have been integral to art from the very beginning, and that art can serve as an agent for societal transformation and audience engagement. Artists and designers lend voice, image, and meaning—to complex societal issues and create ever-evolving dialogue. In this spirit, as a final project, students are challenged to create a mindful work of art for audiences to understand their unique point of view and to be communicative of a current social/cultural issue that is most relevant to them.
